The term Law of Attraction first originated in 1906 when author and publisher William Walker Atkinson released his new thought movement book: "Thought Vibration or the Law of Attraction in the Thought World" (Chicago, 1906). He also was brave enough to use the term "vibration" (scary enough word for any other author to use or understand back then).

Coulomb's law, or Coulomb's inverse-square law, is a law of physics for quantifying Coulomb's force, or electrostatic force. Electrostatic force is the amount of force with which stationary, electrically charged particles either repel, or attract each other. This force and the law for quantifying it, represent one of the most basic forms of force used in the physical sciences, and were an ...

Newton's law of universal gravitation states that every particle attracts every other particle in the universe with a force which is directly proportional to the product of their masses and inversely proportional to the square of the distance between their centers. This is a general physical law derived from empirical observations by what Isaac Newton called inductive reasoning.
