In the fields of medicine, biotechnology and pharmacology, drug discovery is the process by which new candidate medications are discovered. Historically, drugs were discovered through identifying the active ingredient from traditional remedies or by serendipitous discovery. Later chemical libraries of synthetic small molecules, natural products or extracts were screened in intact cells or ...

Abstract Policy practitioners apply tools and frameworks to policy challenges in order to improve social, economic, and environmental outcomes. Could such tools and frameworks be applied to improve the quality of policy design itself? In 2014, prompted by evidence of widespread inconsistency in the quality of policy advice being produced across agencies, the New Zealand Government launched the ...
