

### lectures on logarithmic algebraic pdf

Several important formulas, sometimes called logarithmic identities or logarithmic laws, relate logarithms to one another.. Product, quotient, power, and root. The logarithm of a product is the sum of the logarithms of the numbers being multiplied; the logarithm of the ratio of two numbers is the difference of the logarithms.

Let  $\pi(x)$  be the prime-counting function that gives the number of primes less than or equal to  $x$ , for any real number  $x$ . For example,  $\pi(10) = 4$  because there are four prime numbers (2, 3, 5 and 7) less than or equal to 10. The prime number theorem then states that  $x / \log x$  is a good approximation to  $\pi(x)$ , in the sense that the limit of the quotient of the two functions  $\pi(x)$  and  $x / \log x$  as ...
