### **legacies arent just for pdf**

6 is the largest of the four all-Harshad numbers.. A six-sided polygon is a hexagon, one of the three regular polygons capable of tiling the plane. Figurate numbers representing hexagons (including six) are called hexagonal numbers. Because 6 is the product of a power of 2 (namely  $2^1$ ) with nothing but distinct Fermat primes (specifically 3), a regular hexagon is a constructible polygon.

### **6 - Wikipedia**

Don Tyson wasn't just a chicken farmer, much like the plantation owners weren't just cotton growers. He was a multi-billionaire running a global corporation.
