Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.

INTRODUCTION TO ANGELS (AN-100/3.0 Credit Hours Revised): Angels have been in this Universe for as long as the Universe has existed. The Angelic realm affects all life. As humans, we have been aware of their existence throughout our known time, but we see certain times where our interest in Angels has flourished.
