Hypertriglyceridemia, a condition in which triglyceride levels are elevated, is a common disorder in the United States (see the following image). It is often caused or exacerbated by uncontrolled diabetes mellitus, obesity, and sedentary habits, all of which are more prevalent in industrialized societies than in developing nations.

The National Poll on Healthy Aging found that 1 in 4 older adults report filling an opioid prescription within the last 2 years. Yet only 59% report talking to their provider about when to reduce the amount of medication. Further, only 13% reporting disposing of the medication properly while 86% kept the medication in case they had pain again.

A podiatrist, also known as a podiatric physician (/poˈdiˌætrɪst/ poh-dye-eh-trist) or "foot and ankle surgeon", is a medical professional devoted to the study and medical treatment of disorders of the foot, ankle and lower extremity. The term originated in North America, but has now become the accepted term in the English-speaking world for all practitioners of podiatric medicine.
