Mathematical and Computational Applications (ISSN 2297-8747; ISSN 1300-686X for printed edition) is an international peer-reviewed open access journal on the applications of the mathematical and/or computational techniques published quarterly online by MDPI from Volume 21 Issue 1 (2016).. Open Access - free for readers, with article processing charges (APC) paid by authors or their institutions.

Mathematical and theoretical biology is a branch of biology which employs theoretical analysis, mathematical models and abstractions of the living organisms to investigate the principles that govern the structure, development and behavior of the systems, as opposed to experimental biology which deals with the conduction of experiments to prove and validate the scientific theories.

A computational model is a mathematical model in computational science that requires extensive computational resources to study the behavior of a complex system by computer simulation.. The system under study is often a complex nonlinear system for which simple, intuitive analytical solutions are not readily available. Rather than deriving a mathematical analytical solution to the problem ...
